Its like your driving on ice.. ive played some bad racing games. Well this one tops it off. omg horrible. Did a 6 year old code this overnight? With his mom?. I remember playing this on the 360 and I loved it! The only thing is that I didn't get the chance to play online with other people on 360 and hopefully the MP will be fully ressurected for this game via PC! It's a great FPS that, as a friend said in his review, should of set the standard for game series like MOH, COD, and Battlefield! The one thing that I regret is that the devs haven't made a sequel! I hope Nordic Games does though, albeit in a form of a new title! One other thing that I must say, if you are getting this game, I suggest you get PhysX Legacy since this game does need it to run on Windows 7! That sucks, but it's a small price to pay for a great game!. I hate this game so, so much. It's just so bad in so many ways. It's so bad it actually killed a small piece of my soul. I'll never get that back. Can't say stay away enough. Even if it's free just move on. Please save yourselves. It's too late for me.. I love this game. Played it since I was young. I still do speed runs with it using my original game and a Mac OS 9 emulator. Hopefully version this will be less glitchy. Still would like a Mac compatible version through Steam though. For now, I guess we'll see how cleanly Windows 10 via Parallels runs it. Glad they put this one up.. I am a fan of the Fabulous series and Angela's High School Reunion was no exception. The characters are dramatic and the story is dramatic. I also liked the variety of settings, making each chapter feel fresh and new. I also found this game more challenging than the previous game, which was kind of nice to up the ante.

Unfortunately for me, the continuous stages were bugged. It made me glad I bought this game on sale.

I will be looking forward to buying the next one though!

. I really enjoyed this puzzle game. It takes the "start on one block and run along all other blocks without reusing a block or getting trapped" and it adds a couple things. You're an adventurer collecting coins. And since you can't pass a level without standing on every block (including the coin ones) you'll never lose out on your growing fortune. On the flip side, I have no idea what those coins are for but.... they sure are fun to collect! Also, on each level, is a brown box which is your exit. So try to angle towards that last. If you run onto the brown block without stepping on all the others, there's a weird explosion noise and you begin at the start of the level.

There are 60 levels and most you'll probably whiz by. But I found quite a few a little challenging and I found all of them fun. This game won't win any graphic awards but the music was nice and catchy. If you enjoy puzzles and particularly if you enjoy 100%ing a steam game, I recommend this. I'm actually a bit sad illie isn't longer. If they add content or come out with illie 2, I'm all over that!. Downloaded the game as they said the single player was free.

Well apparently they made the pvp free.

This would be fine if there was anybody else online to start a match, but as it stands you cannot create a custom match alone and there is not enough people online to play.

So the free version is unplayable. Don't waste your time downloading this.

Perhaps I would have bought the game if I was even given a brief tutorial (5 mins) but I can't even see the gameplay without spoiling it online so I guess I shall take my money elsewhere. Elite dangerous is pretty cool. If you want a SOLO PLAYER experience then there is a really old version available for download that has tutorials so you can see if the game is for you.. Like some others on here, this was my first DLC as these were regular units on my local line when I were a lad and I often sat behind the driver pretending I was driving the train and watching the driver change gears, notching up/down and braking. This DLC replicates all that you have seen the driver do and I find this to be a very enjoyable unit to drive. It is quick drive enabled so you can drive it on any route imaginable.. Mini Battle Royale game!?! Supppppper fun! Looking forward to seeing what the devs bring next. Love the chibi style to it as well. Very simple to understand.. Finishing this game took me 34 hours. Was that good time? Definitely yes, I spent a great time with that. But that doesn't mean that every player will like it as I do. First of all, you must be real RPG fan, and what is most important, you must be old-school gamer. Because this game is true old-school RPG with very poor animations and weak graphics (as for today). But if you're ok with that, you will like it. It has good story, turn based

combat and high difficulty level.

VERDICT:

If you're old-school RPG fan, this is what you need.

If you're modern RPG fan but you want to try something classic, this is good choice.

If you're not a fan either of RPG and old-school, you shouldn't even read this, that might harm you.

Uplink did a better job being a game about hacking computers. This is all just clicking on stuff and not actually thinking. It's also buggy as hell (the main interface randomly disappears).

Avoid!. As of 4/25/18, not worth it. I picked it up for 5 bucks, spent a few hours getting 45 floors down, and am bored. Not returning, and will absolutely try again after 3.0 release. Feels like a standard dungeon crawler, with not so subtle puzzle elements on choosing targets and equipment.. rpg?????????????????????????????????????. This game is probably the best co-op vr game together with keep talking and nobody explodes, and vr the diner duo.

In the game, one player plays in VR as the giant robot overseer, whose job it is to protect the factory, more specifically the 4 generators in the factory.

The other player, playing on the pc is a little robot and has to disable all the 4 generators. It is easy to blend in with the hundreds of other small robots, however there is an exciting twist!

Both players have 3 different special abilities that can only be used once, unless you disable that in the settings menu. The rogue can for instance blind the overseer, and the overseer can freeze all robots except the player.

The developers of this game are great, (i had an issue with it, and they fixed it within the same day).

Overall i highly recommend this game, it is great fun with friends and family!. I really wanna play this game and like it but whenever i play a sprint race the game likes to freeze whenever it wants... Please dev's if you are reading this is there any way to fix this???????! cuz i cant progress at all due to these F***** crashes....

Will change review if it's fixed. This game is not for everyone. Coming from someone who played Playstation Home for 6 years I can say from the small time I have played it has a ton of potential. The negative reviews I see from people are VERY mixed and I had experienced NONE of their problems. The game ran perfectly smooth on my system and connection was fantastic.

The coolest part is this is a cross platform game with PS4.

The controls so far are pretty solid and very easy to use for the chat interface and interactions around you. The visuals are like eye candy, spot on. Some parts could use a little work but overall gives you a nice environment to explore. Audio is fantastic and the spaces are interesting. Much room for improvement ahead in the future, more space, more items, more customization, personal spaces, sponsor spaces (for example the Red Bull spaces in Playstayion Home) are all in the lineup for what this platform has to offer.
